EcoSavers®
Energy Meter

The EcoSavers® Energy Meter is a high quality measuring device which gives you more control on your electricity use.

Simply plug in the energy metre in the mains and plug the device you want to measure into the energy meter.

The energy meter gives you all the important information, like energy consumption in KWh and EUR/currency, energy use at this moment (Watt), measuring time etc.

Measuring = knowing. This product contributes to the awareness of energy use and gives you exact information about the use of energy, so you can decide how to save energy.

Working condition:
Operation voltage:	230Vac/50Hz
Width voltage range:	150Vac ~ 276Vac
Operation current:	max. 16A
Wattage display range:	0.0W ~ 9.999W
	(max. 16A/3.680W)
Voltage display range:	0.0V ~ 9.999V (max. 276V)
Current display range:	0.000A ~ 9.999A (max. 16A)
Price display range:	00.00€/KWh ~99.99€/KWh
Total KWH display range:	0.000KWh ~ 9.999KWh
Total cost range:	0.00€ ~ 9.999€
CO2 display range:	0.00 ~ 9.999 kg
